SUMMARY

Full Stack AI Engineer doing a Master's in AI (Université Côte d'Azur) alongside an Amadeus apprenticeship and freelance production AI work. I build AI agents, RAG assistants, computer-vision pipelines and their full-stack apps, end to end.

EXPERIENCE

Full Stack AI Engineer — Apprenticeship

Sep 2025 – Present

Amadeus · Villeneuve-Loubet, France

- Design agentic AI workflows that turn internal knowledge sources into LLM-ready formats.
- Built an AI support agent for the developer community, plus GitHub automation and statistics workflows.
- Lead automation initiatives and run internal trainings on AI tools.

Freelance AI Engineer

Sep 2025 – Present

Remote · production AI systems delivered for clients on behalf of an AI agency

- **Parenting & wellbeing:** RAG expert over ~14,700 pages of course material whose answers must cite a source or decline.
- **Civil engineering:** assistant that drafts 30+ page technical specifications (CCTP) with PDF/Word export.
- **Industrial engineering:** agentic B2B prospecting engine with explainable, deterministic lead scoring.
- **Construction:** daily payment-reminder agent that is idempotent and keeps a human in the loop.
- **Solar energy:** pipeline that turns weekly industry news into subtitled AI-avatar videos.
- **Maison Salah (direct client):** bilingual website for a Marrakech real-estate consultancy.

Stack: Python, TypeScript, LangChain, OpenAI, Mistral, n8n, FastAPI, Next.js, Supabase pgvector, Qdrant.

Full Stack AI Engineer

Feb 2025 – Aug 2025

Deep2Drive · Marseille, France

- Developed computer-vision models for driver monitoring: gaze estimation, object detection, behaviour analysis.
- Built video preprocessing pipelines for training and inference (PyTorch, OpenCV).
- Ran and scaled training and inference on Microsoft Azure Batch.

NLP Developer — Internship

Apr 2024 – Jun 2024

3D Smart Factory · Mohammedia, Morocco

- Built a resume analysis and ranking platform (spaCy, Elasticsearch, SVM classifier, FastAPI).

Internships 2022–23: INNOV DS – e-commerce REST API (Node.js, Express, MongoDB) · Moda Cerame – inventory app.

PROJECTS

- **SwiftServe:** Jakarta EE MVC2 framework (final-year project) with a front controller and auto-generated REST services.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

AI, LLM & NLP: Agentic AI Workflows, LLM agents, RAG, LangChain, n8n, OpenAI, Mistral, Prompt Engineering, Transformers, spaCy, NLTK, Text Classification, Information Extraction

ML & Vision: PyTorch, TensorFlow, Deep Learning, SVM, OpenCV, scikit-image, Object Detection, Gaze Estimation, Video Processing

Backend & Web: FastAPI, Node.js, Express.js, Next.js, React, REST APIs, Jakarta EE, BeautifulSoup

Data: PostgreSQL/Supabase + pgvector, Qdrant, Elasticsearch, MongoDB, MySQL, Redis, NumPy, Pandas

Cloud & DevOps: Microsoft Azure (Batch, ML, Blob Storage, DevOps), Docker, Git, GitHub, GitHub Actions, GitLab

Practices: Agile, Scrum, Kanban, UML, Unit Testing (pytest), Technical Documentation

EDUCATION

Master's in Computer Science – Artificial Intelligence · Université Côte d'Azur, Nice · 2025–2027

Bachelor's in Computer Science (Licence 3) · Aix-Marseille Université · 2024–2025

Professional Bachelor's in Big Data · Université Sultan Moulay Slimane, Morocco · 2023–2024

DUT in Computer Science – Software Engineering · EST Fès, Morocco · 2021–2023

LANGUAGES & INTERESTS

French (fluent) · **English** (fluent) · **Arabic** (native) | Hackathons & tech events (GITEX), student association, sports coaching
